MILITEC LTD

COMPANY PROFILE

Militec was founded in early 1997 with a workforce already experienced in the production of shooting target equipment.

Initially, the business concentrated on the supply of equipment to shooting clubs, but as private shooting was curtailed in the UK, the company focussed its attention on the supply of target equipment to the security forces.

Militec now specialises exclusively in the design, manufacture and servicing of fixed and portable firing range equipment together with related products for the Military and Law Enforcement Agencies.

The company has adopted a Quality Management system that conforms with ISO9001 standard and its compliance with this quality system is intended to convey confidence to potential customers in that the products being offered would meet their requirements in both quality and performance.

Our objective is to provide equipment that can be deployed, used and maintained by personnel with the minimum of training. Robust in construction and exacting build standard ensures that our equipment is able to survive harsh environments and rough handling. We pride ourselves on the continued development of new and improved products to meet the ever demanding needs of our customers according to their budgets.

Based in South Wales our knowledgeable staff will be pleased to advise you and discuss any matter concerning the supply of Small Arms Target equipment.
