MILITEC LTD

AC290 PORTABLE SMOKE MACHINE

Compact and robust
Water based non toxic smoke
"Smoke" remaining visible for long periods
Controllable smoke output
Very small particle size 0.4 – 0.6 μ mass median diameter

The high output battery powered smoke machine provides a fog very quickly and efficiently without the need to be connected to a mains electrical supply. The unit has a very short heat-up time meaning it is ideal in Close Quarter Training scenarios.

The machine is compact, easy to carry and operate either manually prior to a training exercise being run, or remotely from a radio handset, or incorporated within a Close Quarter training exercise and being signalled by an interactive initiator.

The fog output can be set to run from 1 to 600 seconds. The vapour condenses to form a "smoke" effect with a very small particle size which means that dense smoke can be achieved for substantially lower concentration of chemical in the atmosphere.

GENERAL SPECIFICATIONS

Size: (L x W x H)	310 x 215 x 180mm
Weight	7 kilos
Power requirement	400W
Heat up time	1 second
Duration of smoke at max. Output	10mins continuous
12Volt. Integral battery	250 hours on stand-by
