

MILITEC LTD

C9004RM INTERFACE UNIT

The C9004RM acts as an Interface between the Militec controllers and the target mechanisms.

There are a number of versions available to suit a customer's particular range requirements.

The C9004RM-USB is linked to the PC via a USB lead which also powers the interface. Target Units are then controlled directly from the PC in a dedicated control room.

The C9004RM-F-WIFI is a fixed WiFi interface which would be installed within the range. It is powered via a power pack which plugs directly to mains power.

The C9004RM-P-WIFI is a portable WiFi interface which has an internal rechargeable NiMH battery pack which enables it to be used on outdoor ranges.

Physical Specifications:

Dimensions

Width	190mm
Height	60mm
Depth	240mm
Weight approx	1.45Kilos
Radio Freq.	400 to 470Mhz
Power output	100mW
