MILITEC LTD
C9200M TARGET CONTROL HANDSET

The C9200M Range controller can be supplied in a range of languages.

It is an easy to use radio handset, which enables the user to:-

i) Manually control individual targets, groups of targets and movers.

ii) Provide a simple timer facility to program and run Face/Edge/Repeat sequences.

iii) Allow shoot programs configured on a PC, using the Militec PC-Shoot software, to operate target bases independently or in groups, with different time exposures and hit reactions.

iv) Controller to PC download lead USB to Mini USB type B

Hit results can be viewed on the screen and uploaded to the PC if required.

GENERAL FEATURES

Weight	500 grams, including batteries and leather case
Size	235mm x 120mm x 60mm. (L x W x H)
Keypad operation	4 x 7 membrane keypad
Display	Graphic display with contrast control
Power	4 No. 1.2V NiMH, re-charged via charge socket
Radio transceiver	400-460MHz 100mW 8 separate channels with 50KHz spacing
Frequency agility	Target identification address number and/or radio channel can be changed from the handset
Manual control	Individual or Group or All target units
Local programming On the handset	Face/ Edge timing 1 to 999 secs Sequence repeat 1 to 999 times Internally stored
