

MILITEC LTD

AC295 PORTABLE RETALIATORY FIRE MECHANISM

The AC295 Portable Retaliatory Fire Mechanism has been designed in conjunction with Militec portable target equipment, specifically for use in Close Quarter training scenarios. It is a compact and robust unit that utilises a MP5K Air-soft weapon that uses 6mm plastic BB's ammunition.

It can be operated either remotely from:-

- i) a radio handset controller
- ii) or from a Trigger device
- iii) or from an adjacent target mechanism via a cable link
- iv)

The rate of fire is time based which is selectable from either the controlling handset or the targetry controlling software

General specification:-

Size: (L x W x H)	390 x 300 x 370mm
Weight	3.5 kilos
Power	12vdc internal battery pack
Operational distance	Up-to 1000mtrs
Max Distance of BB's	20mtrs

Note: The ammunition must not be re-used.
