

MILITEC LTD

UTILITY BACK-PAK

The Militec Utility Back-Pak has been developed as an aid for troops on training exercises being deployed into difficult access areas.

To carry a target mechanism, battery packs plus target boards while allowing for both arms and hands to be free to carry their weapon.

The target holding pouch at the rear is easily detachable if necessary.

The Back-Pak also allows for other difficult to man handle objects to be more easily conveyed on the soldiers back. E.g. Water can, ammunition etc.
