AC290 PORTABLE SMOKE MACHINE

Compact and robust
 Water based non toxic smoke
 "Smoke" remaining visible for long periods
 Controllable smoke output
 Very small particle size 0.2 micron mass median diameter

The high output battery powered smoke machine provides a fog very quickly and efficiently without the need to be connected to a mains electrical supply. The unit has a very short heat-up time meaning it ideal in Close Quarter Training scenarios.

The machine is compact, easy to carry and operate either manually prior to a training exercise being run, or remotely from a radio handset, or incorporated within a Close Quarter training exercise and being signalled by an interactive initiator.

The fog output can be set to run from 1 to 60 seconds. The vapour condenses to form a "smoke" effect with a very small particle size which means that dense smoke can be achieved for substantially lower concentration of chemical in the atmosphere.

General specification:-

Size: (L x W x H)	310 x 215 x 180mm.
Weight	7 kilos.
Power requirement	400W.
Heat up time	1 second.
Duration of smoke at max. output	10mins, continuous, or up to 150 5sec bursts.
12Volt. Integral battery	250hours on stand-by.
