BATTERY CHARGERS

Single and Multiple output battery chargers for use with the AC005 Portable Battery pack.

Mode of Operation

The chargers provide a completely automatic charging system where an initial boost charge, as indicated by the red boost LED, is provided until at least 90% of the battery's capacity has been restored, then the output is automatically switched to trickle charging with the green LED flickering before becoming steady indicating a fully charged battery. The battery may be left connected indefinitely without causing any damage.

B225 SPECIFICATIONS

Weight 8 kilos
 Four outputs
 Each 13.8Vdc
 Input 240Vac 3A
 Dimensions
 500mm x 300mm x
 240mm (L x W x H)

B215 SPECIFICATIONS

Weight 2 kilos
 Single output
 240Vac 3A input.
 Dimensions
 200mm x 165 x
 105mm (L x W x H)

For multiple charging of AC005 battery packs simultaneously the B225-4 can be supplied fitted to racks.

AC005 SPECIFICATIONS

Weight 4.5 kilos
12Vdc. 13 Ahr sealed lead acid battery
Tri coloured LED provides battery
status indication.

Dimensions
175mm x 120mm x 130mm (L x W x H)
