M2200MF FAST TURNING TARGET MECHANISM

The M2200M/F is a dedicated fast turning target mechanism designed for basic classification and judgement/decision shooting

The power unit for the M2200M/F can be portable or fixed, battery powered and radio controlled or mains powered with line or radio control.

The power unit itself is fitted within a tubular frame, which provides a stable platform.

In the portable mode a separate 12Vdc power pack is connected to the unit by means of a 'Quick Fit' military connector.

In the Fixed mode the 12Vdc is supplied from a separate 220/240Vac to 12Vdc PSU.

SPECIFICATIONS

Weight	16 Kilos (without battery pack)
Size(without batt. pk)	400mm x 300mm x 330mm (LxWxH)
Turn time	0.3 sec. (edge to face)
Hit sensing	Internally mounted and remotely adjustable
Construction	Corrosion resistant treated steel
Finish	Dark green, BS381C

GENERAL FEATURES

Weight	16 Kilos
Fast turning target mechanism	Vertical turning only 0.30sec. from Edge to Face
Hit sensor	The hit sensor is fitted internally, with sensitivity adjustment carried out from the control
Remote hit response	Each target can be independently set to respond to hits on the target
Operational capability in portable mode	A fully charged battery has sufficient capacity to turn a standard vertical target in excess of 2500 times
Radio	Internal transceiver module Frequency 433Mhz or 458 Mhz (standard)
Operational distance	Up-to 1000 Metres
12Vdc. Power	Both battery and PSU with 'Quick Fit' bayonet connector
Frame (with battery)	A tubular frame makes it easy to carry and provides a positive location when in use. 500 x 300 x 330mm (LxWxH)
Frame (with PSU)	A tubular frame that provides a positive base location. 400 x 300 x 330mm (LxWxH)
Construction	The enclosure is manufactured from zinc coated sheet steel and finished in polyester powdered paint that is stoved to provide a hard and durable finish.

All metal fixings used are manufactured from stainless steel.
